OUR HISTORY

WHO WE ARE

Supreme Lamination was established under the leadership of Mr. Ajeet Lal to manufacture reliable, non-hazardous plastic components for industrial applications. From the outset, we have focused on consistent quality, timely delivery, and practical problem-solving for customers across India. With 38+ years of domain experience, Mr. Ajeet Lal remains closely involved in raw-material evaluation, process control, moulding precision and dispatch planning enabling dependable output even under urgent schedules. We operate advanced production lines with rigorous in-process checks and batch traceability. Every order is produced to specification and verified against customer requirements and industry standards.

Trusted by leading enterprises in:

- Mining & quarrying consumables
- Industrial explosives accessories (non-hazardous housings)
- Packaging & film conversion
- Specialised industrial components

What sets us apart:

- On-time delivery with flexible production scheduling
- Repeatable quality through tooling discipline & process audits
- Practical MOQs and rapid changeovers for custom parts
- Full material traceability and controlled documentation

- EACH COMPONENT IS ENGINEERED FOR SEAMLESS PRODUCTION AT SCALE.
